Dear Mr. Weisberg;

I have been researching the assassination of John Kennedy for the past two years. As my special interest in the case is the medical and physical evidence I greatly enjoyed your last book, Post Mortem.

I would like to know if any new information has come out regarding the Neutron Activation Analysis tests that were conducted by the FBI. I'd also like to know whether any new information has come out regarding the autopsy X-rays and photographs.

Lastly I would like to know if you can recommend any forensic pathologists who have either written on the subject or have helped you in your work. Are there any articles I can obtain on the medical evidence besides those of Cyril Wecht?

I greatly appreciate any help you can offer and hope that you come out with a new book soon.

Sincerely yours,

Fred Litwin
